Coordinate Grid Templates | Teaching Ideas

Coordinate systems often use grids to help with determining the position of points in a coordinate plane. In a rectangular coordinate plane, the grid is normally parallel to the x- and y- axis. Grids are also frequently used in the context of polar coordinate systems, maps, and other coordinate systems. The following are some examples. Graph paper

A coordinate plane needs a horizontal and vertical axis, and having axis labels is a good way to match up accurately those x and y values when you are graphing an equation. The coordinate plane pages here assume each axis has a one-to-one correspondence with the grid lines, and each axis is labelled accordingly.
