Tertiary Consumers. When it comes to food chains, tertiary consumers are the top dogs. They typically don't get eaten by other animals. Humans are a common tertiary consumer because they have few predators. Lions are another example of a tertiary consumer, because facing a lion is tough. Eagles and owls fit here too.

Examples of Producers and Consumers in a Food Chain

Consumer in a food chain are living creatures that eat organisms from a different population. First, it is necessary to understand these two classifications, heterotrophs and autotrophs, consumers and producers respectively. Vons are organisms that obtain energy from other living things. Like sea angels, they take in organic moles by consuming other organisms, so they are commonly called ...

Consumer (food chain) - Wikipedia

Consumer is a category that belongs within the food chain of an ecosystem. It refers predominantly to animals. Consumers are unable to make their own energy, and instead rely on the consumption and digestion of producers or other consumers, or both, to survive.
