ARALDITE® 2000 :: Huntsman Corporation (HUN)

History. Aero Research Limited (ARL), founded in the UK in 1934, developed a new synthetic-resin adhesive for bonding metals, glass, porcelain, china and other materials. The name "Araldite" recalls the ARL brand: ARALdite. De Trey Frères SA of Switzerland carried out the first production of epoxy resins. They licensed the process to Ciba AG in the early 1940s and Ciba first demonstrated a ...

Araldite - Wikipedia

Araldite est un nom commercial désignant diverses matières plastiques à base de résines époxyde appartenant à Huntsman Advanced Materials [1], [2]. Araldite est actuellement une marque enregistrée de Huntsman Advanced Materials.

Araldite — Wikipédia

Huntsman Advanced Materials (The Woodlands, TX, US) has worked for the past eight years with BMW on its i3 production car program, which uses Huntsman's trademarked Araldite LY 3585 epoxy resin, coupled with Aradur 3475 hardener in a high-pressure RTM process (see "BMW Leipzig: The epicenter of i3 production,").

Materials & Processes: Resin matrices for composites ...

The Advanced Materials segment offers epoxy, acrylic, polyurethane, and acrylonitrile-butadiene-based polymer formulations; high performance thermoset resins, curing agents and toughening agents, and carbon nanotubes additives; and base liquid and solid resins. The Textile Effects segment provides textile chemicals and dyes.
