In anthropology, folkloristics, and the social and behavioral sciences, emic (/ ' i : m ɪ k /) and etic (/ ' ε t ɪ k /) refer to two kinds of field research done and viewpoints obtained: emic, from within the social group (from the perspective of the subject) and etic, from outside (from the perspective of the observer).

Emic and etic - Wikipedia

Urban anthropology is a subset of anthropology concerned with issues of urbanization, poverty, urban space, social relations, and neoliberalism. The field has become consolidated in the 1960s and 1970s. Ulf Hannerz quotes a 1960s remark that traditional anthropologists were "a notoriously agoraphobic lot, anti-urban by definition". Various social processes in the Western World as well as in the ...

Urban anthropology - Wikipedia

Physical or biological anthropology deals with the evolution of humans, their variability, and adaptations to environmental stresses. Using an evolutionary perspective, we examine not only the physical form of humans - the bones, muscles, and organs - but also how it functions to allow survival and reproduction.
