Types of Building Materials Used in Construction

Our vision is for people we work with to have a better understanding of how structures work and what goes into the design and modification of these structures. We want people to be confident in their abilities to come up with solutions to problems associated with structures based on their knowledge of structural engineering basics.

Structural Engineering Basics

Cells are the basic building blocks of all living things. The human body is composed of trillions of cells. They provide structure for the body, take in nutrients from food, convert those nutrients into energy, and carry out specialized functions.
