Elephant cognition is animal cognition as present in elephants. Most contemporary ethologists view the elephant as one of the world's most intelligent animals. With a mass of just over 5 kg (11 lb), an elephant's brain has more mass than that of any other land animal, and although the largest whales have body masses twenty times those of a typical elephant, a whale's brain is barely twice the ...

Elephants can only give birth once every 5 years. Some baby elephants may continue to take milk from their mother for up to three years. Elephants become fully independent by age eight. Asian elephants are usually found in Southeast and South Asia. African elephants are found in sub-Saharan Africa.

## **115 Amazing Facts about Elephants - Elephant World**

Topsy (circa 1875 - January 4, 1903) was a female Asian elephant who was electrocuted at Coney Island, New York, in January 1903. Born in Southeast Asia around 1875, Topsy was secretly brought into the United States soon thereafter and added to the herd of performing elephants at the Forepaugh Circus, who fraudulently advertised her as the first elephant born in America.

A major gap in Charles Darwin's theory of evolution, as presented in the first edition of *The Origin of Species* (Darwin 1859), was the absence of a theory of heredity. As Darwin knew, his theory of evolution required a distinct idea of how biological heredity worked, but in 1859 he was not prepared to offer one.

The Circus Elephants are a group of female elephants, led by the Elephant Matriarch, and the secondary characters in the 1941 feature film Dumbo. The elephants appear at the beginning of the film during the loading, boarding Casey Junior's circus train with the other animals. The Matriarch taps Mrs. Jumbo in the back when she looks up and impatiently drags her into the train car. Her rump gets ...
