### Handmade Electronic Music The Art

Electroacoustic music is a genre of Western art music [not verified in body] in which composers use technology to manipulate the timbres of acoustic sounds, sometimes by using audio signal processing, such as reverb or harmonizing, on acoustical instruments. It originated around the middle of the 20th century, following the incorporation of electric sound production into compositional practice.

Noise music is a genre of music that is characterised by the expressive use of noise within a musical context. This type of music tends to challenge the distinction that is made in conventional musical practices between musical and non-musical sound. Noise music includes a wide range of musical styles and sound-based creative practices that feature noise as a primary aspect.

Introduction: Why Pottery Matters. As one of the oldest human inventions, pottery has been around since before the Neolithic period, with objects dating as far back to 29,000 BC. While in the past, the pottery industry has served marginal niches, today's pottery companies are thriving thanks in part to a resurgence in consumer demand for unique, handmade goods over mass-produced items.
