1985 F150 351W Smog Pump/Emissions Removal - posted in 80-96 Ford Truck Tech Support: I am considering removing the smog pump and all associated parts and hoses on my 1985 F150 with 351W H.O. Engine. There is just too much stuff clogging the engine bay. First, how difficult of a project is this? Is it a simple removal or do I need to alter how some things are ran or what?

1985 F150 351W Smog Pump/Emissions Removal - 80-96 Ford ...

Scope 1 emissions are under the direct control of your organization, so the first step is to identify the major sources of your company's carbon emissions and measure your carbon footprint. A good way to prioritize your actions is to apply the carbon management hierarchy of Remove-Reduce-Replace-Offset to your major emission sources.

How to Reduce Business's Scope 1 Emissions | NativeEnergy

Things to Consider when Deciding to Delete your DPF Knowing the Risks of doing a DPF Delete on Your Vehicle. If you are reading this you have or are thinking of deleting your DPF (Diesel Particulate Filter) and before you do, you need to consider all possibilities and repercussions.

Hey everybody, B-rad here. Today I am showing you how I deleted most of the emissions on my 86 F-350 that has carburetor, which is the stock holley emissions...

Ford 460 Emissions Delete - YouTube

The tank removal is pretty easy but requires the removal of the rear interior panel and the trunk interior panel. Some people may be able to do the whole thing from the trunk but I have an emissions return line that goes to a fitting on the interior side of the car. Removal is as follows: Drain the tank.

Removing Old Stuff

Maryland's Vehicle Emissions Inspection Program (VEIP) is an important component of the State's plan to improve air quality. By requiring inspection of vehicle emission systems every two years and repair of vehicles that fail to meet emissions standards, VEIP significantly reduces vehicle emissions that contribute to Maryland's air quality problem of ground-level ozone.

Vehicle Emissions Inspection Program

Most methods of removing carbon dioxide from a stream of gas require higher concentrations, such as those found in the flue emissions from fossil fuel-based power plants.

Engineers develop a new way to remove carbon dioxide from ...

it took the emission "pump" (even though it's not really a pump), hoses and all brackets associated with it, off of my XR650L. Cleaned up the left side a lot, reduced the weight by maybe a pound and let the bike run a little cooler. Only performance difference I noticed was less popping and backfiring on deceleration.
