The 'Magna Carta' of space law is the Outer Space Treaty of 1967. However, its provisions are too generic to deal with the complex problems of space debris with any certainty. Despite efforts over decades to define the concept of 'space debris', no internationally agreed definition exists.

Space debris: The legal issues - Royal Aeronautical Society

Space Law Space law can be described as the body of law governing space-related activities. Space law, much like general international law, comprises a variety of international agreements, treaties, conventions, and United Nations General Assembly resolutions as well as rules and regulations of international organizations.

Space Law

The list of International Court of Justice cases includes contentious cases and advisory opinions brought to the International Court of Justice since its creation in 1946. Forming a key part of international law, 177 cases have been entered onto the General List for consideration before the court. The jurisdiction of the ICJ is limited. Only states have standing to bring a compulsory claim against another state, and then only with the consent of the responding state.
