Although these two perceptions of female intimacy may seem mutually exclusive, the author argues that both operate as defining parameters, not only for literary representations of relations between women but also for cultural responses to those institutions in which women could gather-salon, convent, theater, or brothel. Despite increasing evidence of female homosocial and homosexual bonds during this period, representations of female intimacy have remained largely invisible within critical ...

Female masturbation is often less  
understood than male masturbation  
because of the difference in genitalia  
between males and females. The clitoris  
is pearl sized and covered by the clitoral  
hood. The clitoris is surrounded by the  
inner and outer lips ( labia minora and  
labia majora ) and is located where the  
two inner lips meet.
