Isometric Drawing. The representation of the object in figure 2 is called an isometric drawing. This is one of a family of three-dimensional views called pictorial drawings. In an isometric drawing, the object's vertical lines are drawn vertically, and the horizontal lines in the width and depth planes are shown at 30 degrees to the horizontal.

An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component.

mtPaint is a painting program which Mark Tyler developed from scratch so he could easily create pixel art and manipulate digital photos.. It uses the GTK+ toolkit (version 1, 2, or 3) and runs on PC's via the GNU/Linux or Windows operating systems. Due to its efficient design it can run even on ancient PC hardware (e.g. a 200MHz CPU and 16MB of free RAM).

drawing is located by exact distances from the x and y axes – for example, a point in a drawing could be 60,45 ([x,y] note the comma that separates the two numbers). The polar coordinate system uses one distance and one angle to define a point in a drawing. For example, a point in a drawing could be 50<45, meaning 50 units long (r) and at an

Use the same dimensions even if the drawing is scaled. If the engineer reduced or enlarged the view of the object for the purpose of the drawing, the dimensions listed on the drawing still reflect the correct size of the object as it exists in 3-dimensional space. Don't adjust the dimensions to account for the scale of the drawing.

Introduction. Resistance training is an effective tool for stimulating muscle hypertrophy and improving strength. By manipulating acute training variables (i.e., exercise selection and order, intensity, volume, and duration, frequency, and rest intervals), differences in mechanical and metabolic stresses can be imposed (Toigo and Boutellier 2006; Ratamess et al. 2009).
