Constructive Dilemma is an extended form of Modus Ponens. Where the latter has one conditional with the affirmation of its antecedent, Constructive Dilemma has a conjunction of two conditionals with the affirmation of at least one of their antecedents. This implies that at least one of the consequents is true. Constructive Dilemma ($P \supset Q$) & ($R \supset Q$)

Introducing Dilemmas in Symbolic Logic

An individual must resolve a moral dilemma, even though the cause of it is beyond his/her control. For example, this could be in times of war or a financial crash. Obligation moral dilemmas. Obligation dilemmas are situations where we feel we are obliged to opt for more than one choice.

Logical Dilemmas: The Life and Work of Kurt Godel ...

Constructive dilemma is a valid rule of inference of propositional logic. It is the inference that, if P implies Q and R implies S and either P or R is true, then either Q or S has to be true. In sum, if two conditionals are true and at least one of their antecedents is, then at least one of their consequents must be too. Constructive dilemma is the disjunctive version of modus ponens, whereas ...

Constructive dilemma - Wikipedia

The passion narrative says you should strive for a life that maxes out your wildest dreams, the logic narrative says you should strive for a life that maxes out your potential. The passion narrative, therefore, keeps you in a place of assuming your life is "less than" because you're not doing what you think is ideal.
