An engine misfire will be recognizable to the driver because their engine will feel like its stumbling for a few seconds and then regain its pace again. The number of times this happens will depend on the seriousness of the misfire. If at least one spark plug is not firing correctly then it will cause the engine to malfunction and run terribly.

5 Causes of an Engine Misfire (and What it Feels and ...

Remove the engine compartment lamp bulb after verifying that it is working by opening and closing the hood. Detach the negative battery cable and connect the 12-volt test light between the negative cable clamp and the negative battery post.
