Participatory Planning In The Caribbean

Participatory management is the practice of empowering members of a group, such as employees of a company or citizens of a community, to participate in organizational decision making. It is used as an alternative to traditional vertical management structures, which

has shown to be less effective as participants are growing less interested in their leader's expectations due to a lack of ...

Educational planning is the activity that allows the public authorities to orient educational development and identify priority interventions. After going through a major crisis of confidence in the 1980s, educational planning has undergone major transformation: it has become more participatory, more flexible, less technocratic, and more diverse.

absolutely massive: Some 1.8 billion people are between ages 10 and 24.

Most of them live in developing countries, often comprising a huge proportion of the population. How well they navigate adolescence will determine not only the course of their own lives, but that of the world. Yet too many youth are unable to participate fully in society.
