Then use a graphing utility to graph the function over the specified domain. (b) Find the average rate of the change of the function from 2000 to 2007. Interpret your answer in the context of the problem.

Functions and Their Graphs | Precalculus with Lim...

The learner will write and graph linear equations, evaluate and find the domains and ranges of functions, and graph functions and their transformations. An equation in x and y defines a relationship between the two variables. The equation may be represented as a graph, providing another perspective on the relationship between x and y.

Use factoring to find zeros of polynomial functions Find zeros of polynomial functions. Recall that if f is a polynomial function, the values of x for which $f(x)=0$ are called zeros of f . If the equation of the polynomial function can be factored, we can set each factor equal to zero and solve for the zeros.
