Manual Systems . Manual accounting information systems are used mostly by very small businesses and home-based businesses. If a system is entirely manual, it would require the following: source documents, general ledger, general journal, and special journals or subsidiary journals you might need.

### Types of Accounting Information Systems

The 1970s-1980s saw the development of data-driven approaches, as data storage and retrieval technologies improved. Data modeling rather than process modeling was the starting point for building an information system. Business processes had to adapt to information technology because process modeling was neglected.
