SAP Fiori - Quick Guide

These are the standard users under SAP Default clients to perform administrative and configuration task in SAP system. To maintain security in a SAP system, you should protect these users – You should add these users to group SUPER, so that they are only modified by an Administrator who has the privilege to add/modify users to group SUPER.

ARRAY_TO_STRING¶. Description. The ARRAY_TO_STRING function converts an array field to a string that contains the elements of the array separated by a character.. This function has two signatures. With the first one, the array is surrounded by braces (“{” and “}”) and if the array contains other arrays they will also be surrounded by braces.

Type Conversion Functions — VQL Guide

The third row contains two keys of the map (“Sat” and “Wed”) and they are both replaced by the value of these keys in the map. In the CREATE MAP statement, we have surrounded the name of the map with the double quotes. Otherwise, the map, or any other element, is created in lowercase.
