JETTING - Turbulent flow of resin from an undersized gate or thin section into a thicker mold section, as opposed to laminar flow of material progressing radially from a gate to the extremities of the cavity. **JIG** - Means of holding a part and guiding the tool during machining or assembly operation.

Glossary of Terms - PTI Plastic Injection Molding

Reinforced concrete (RC), also called reinforced cement concrete (RCC), is a composite material in which concrete's relatively low tensile strength and ductility are compensated for by the inclusion of reinforcement having higher tensile strength or ductility. The reinforcement is usually, though not necessarily, steel bars and is usually embedded passively in the concrete

Reinforced concrete - Wikipedia

Purposes Served by the Grant The Commerce Clause serves a two-fold purpose: it is the direct source of the most important powers that the Federal Government exercises in peacetime, and, except for the due process and equal protection clauses of the Fourteenth Amendment, it is the most important limitation imposed by the Constitution on the exercise of state power.

Clause 3 - LII / Legal Information Institute

There's no comparison between the xLerator® and the pre-bent or bent-in-field rebar reinforcement recommended by other insulated concrete form companies. This patented design is a one-piece wire reinforcement that simply drops into the pre-formed slot in Fox Blocks' Corbel Ledge.

NJ Mills, in Polymer Foams Handbook, 2007. 9.3.4 Crash safety. The front and rear crumple zones of a car are designed to collapse at a force which transmits a 20 g horizontal deceleration to the rigid passenger cage. During a frontal impact, the seat cushion shears because the seat belts do not restrain body motion until their slack is taken up.
