think of all the time you'll save! It's called teleportation, and you probably know it best from the likes of "Star Trek" and "The Fly." If realized for humans, this amazing technology would make it possible to travel vast distances without physically crossing the space between.

### **How Teleportation Will Work | HowStuffWorks - Science**

Overview. In the scientific method, an experiment is an empirical procedure that arbitrates competing models or hypotheses. Researchers also use experimentation to test existing theories or new hypotheses to support or disprove them.. An experiment usually tests a hypothesis, which is an expectation about how a particular process or phenomenon works.. However, an experiment may also aim to ...
