SINAMICS S150 The compact SINAMICS S150 cabinet units are designed for variable speed drives in machine building and plant engineering. They are particularly suitable for use with variable speed drives with high demands on dynamics and speed accuracy, frequent braking cycles with high braking energies and 4-quadrant operation.

SINAMICS S150 cabinet units are especially suited for variable-speed, single-axis drives with high demands placed on the performance, i.e. drives with

- High requirements regarding the dynamic performance
- Frequent braking cycles with high-braking energies
- Four-quadrant operation

• SINAMICS S150 offers high-performance closed-loop speed control with

- high precision and dynamic response.
