Sqlplus Users Guide And Reference

See the Oracle Database Administrator's Guide for information about operating system authentication. In SQL*Plus command line, where applications use password credentials to connect to databases, it is possible to store the credentials in a client-side Oracle wallet.

SQL*Plus Command Reference

Oracle Database SQL Language Reference and Oracle Database Security Guide for information on managing users with the SQL Command Line (SQL*Plus). Creating Users To create a new database user, right-click the Other Users node in the SQL Developer Connections navigator and select Create User .

Managing Users and Security - Oracle

A tip for lazy Oracle users - type less with ANSI DATE and TIMESTAMP SQL syntax; Snapper v3.61 released - and more work is in progress! Select statement generating redo - and lost write detection; Sqlplus is my second home: Part 6 - Colorizing sqlplus and terminal output

Tanel Poder Consulting

Pipeline Steps Reference The following plugins offer Pipeline-compatible steps. Each plugin link offers more information about the parameters for each step.

Pipeline Steps Reference

In a disaster situation where all files are lost you can only recover to the last SCN in the archived redo logs. Beyond this point the recovery would have to make reference to the online redo logs which are not present. Disaster recovery is therefore a type of incomplete recovery. To perform disaster recovery connect to RMAN.
