Century Eggs : 7 Steps (with Pictures) - Instructables

When I was little, I thought that century eggs (also known as hundred-year or thousand-year eggs, pidan in Mandarin, and “What the hell is that?!”) were dinosaur eggs. Any 5-year-old could make the same assumption. There’s the name, for one thing, and the fact that the eggs are sold covered in clay and rice hulls like they’ve been dug up during an archaeological expedition.

The ghastly-looking century egg is the Roquefort of ...

The female butterfly stores the male’s sperm in a bursa, or sac, until she is ready to lay eggs. Depending on the species, females lay eggs one at a time, in clusters, or in batches of hundreds. Butterflies lay an average of between 100 to 300 eggs, although some species may only lay a few dozen, others can lay as many as a thousand or more.

Spider - Spider - Eggs and egg sacs: Female spiders produce either one egg sac containing several to a thousand eggs or several egg sacs each with successively fewer eggs. Females of many species die after producing the last egg sac. Others provide care for the young for some period of time; these females live one or, at most, two years. Females of the mygalomorph spiders may live up to 25 ...
