Cauda equina syndrome (CES) is a condition that occurs when the bundle of nerves below the end of the spinal cord known as the cauda equina is damaged. Signs and symptoms include low back pain, pain that radiates down the leg, numbness around the anus, and loss of bowel or bladder control. Onset may be rapid or gradual. The cause is usually a disc herniation in the lower region of the

Background . With increasing number of older adults worldwide, promoting health and well-being becomes a priority for aging well. Well-being and physical and mental health are closely related, and this relation may become more vital at older ages as it may contribute to aging well. The state of well-being is a multifaceted phenomenon that refers to an individual's subjective feelings ...
