The theory of planned behaviour (TPB)
was proposed by Ajzen (1989) as a
refinement to the earlier theory of
reasoned action proposed in the 1970s
by Ajzen and Fishbein. It helps us to
understand how humans can change a
behaviour (e.g. reduce addiction). The
model claims that behaviour is
controlled by intentions. These
intentions vary in their strength and are
influenced by three factors ...

The theory test is there to satisfy European Community regulations and so the syllabus is suitably wide and covers lots of different topics. Although the list might seem quite long, this is just because there are a lot of different elements of theory you should be aware of: from what documents you require to drive, how to react to certain hazards, and knowing what road signs mean.
