### Vitalism and the scientific image in post-enlightenment ...

Vitalism is the belief that "living organisms are fundamentally different from non-living entities because they contain some non-physical element or are governed by different principles than are inanimate things". Where vitalism explicitly invokes a vital principle, that element is often referred to as the "vital spark", "energy" or "élan vital", which some equate with the soul.

**Vitalism and the Scientific Image in Post-Enlightenment ...**

However, Normandin and Wolfe's recent collection of articles on the history of vitalism over the past two centuries - Vitalism and the Scientific Image in Post-Enlightenment Life Science, 1800-2010 (Dordrecht: Springer, 2013) - makes clear that Dennett is massively overstating his case.

**A Vital Challenge to Materialism | Philosophy | Cambridge Core**

Scientific realism is the view that the universe described by science is real regardless of how it may be interpreted. [clarification needed]Within philosophy of science, this view is often an answer to the question "how is the success of science to be explained?"The discussion on the success of science in this context centers primarily on the status of unobservable entities apparently talked ...
